# LOCAL IMPACT

## Impact on Local Businesses

Sno\*Drift continues to bring around 2,000 people into Montmorency County and the surrounding areas. This year, we are expecting more than 40 teams consisting of two competitors plus their service crew (often three or more). And it takes around 250 volunteer workers to make a rally run smoothly.

All lodgings in Montmorency County fill rather quickly for this event and people are now being referred to Gaylord, Alpena, Onaway, Mio, Rose City, and West Branch for additional lodging. Additionally, many residents are renting, either lodgings or garage space, which is much desired by the rally teams.

## Residents

In cooperation with the Montmorency County Road commission and the County Sheriff's Office, Sno\*Drift makes a commitment to contact residents/property owners along the roads being closed for special stages to explain the event and obtain signatures of approval. Residents are given specific times that their roads are expected to be closed and roads themselves are posted with those times. Sno\*Drift has found that most residents are very excited to have the rally come to town – it's free entertainment at the foot of their driveway.

## Communications

Volunteer Ham Radio Operators provide communications for the rally. Any licensed Ham Radio Operators interested in participating should contact us by email:

# GOT PICTURES?

If you have a good picture from Sno\*Drift and want to share with us, send it to:

**SnoDriftSpecGuide@gmail.com**

It doesn't have to be a picture of a car, but it does have to be from Sno\*Drift. If we like it, you may see it in next year's Sno\*Drift Spectator Guide.

GPS, Google Maps, etc. are **NOT** the best way to the spectator sites.

Please follow the route instructions given in the spectator guide to the various spectator points.

GPS or mapping software may show a shorter and or faster route. However, what it doesn't show is if the route uses roads that may be closed to through traffic for the rally.

Check the Internet to get the latest information, scores, results, reports, interviews, and pictures. Everything will be posted to the web before, during, and after the rally at [www.sno-drift.org](http://www.sno-drift.org)

## Spectator Guide Cover Photo

If your picture of this year's Sno\* drift rally winner is selected for next year's cover, you'll be eligible for an all access "**SUPER SPECTATOR**" pass for next year's event

If you send it to us, it is ours and your compensation is seeing it in print with a credit

# WHAT IS RALLY

## RALLY

Rally is a flat-out competition over closed sections of rural roads by modified production automobiles. It is different than most car races in that:

- Competitor's race one car at a time against the clock, usually at one-minute intervals
- Competition is done on limited access roads, blocked off from "civilian" traffic, rather than on prepared tracks
- Events can be several hundred miles long, often lasting for several days.
  - Each car has a driver and a co-driver/navigator
- In-between competition stages, the cars travel over public roads and are required to obey all traffic laws

## CAR CLASSES

AWD/4WD: Open, NA-4WD, Limited-4WD, RC2  
2WD: Open, Limited

Most popular are small American and imported sedans such as: Subaru, Dodge, Audi, Ford, VW, Hyundai, Mazda, Mitsubishi, and Toyota. The endurance required for performance rally makes it an excellent showcase for manufacturers!

## EVENTS

The American Rally Association Championship consists of several events held throughout the United States. Sno\*Drift is the first national rally of the American Rally Association Championship series. Most National Rally events feature one Regional Rally event enabling the entry level or regional performance rallyist to run directly against the national series teams. There are also several stand-alone regional rallies in the series.

Each team is given a route book just prior to the start of the event that describes the course in detail with diagrams of turns, notations of water crossing, jumps, and spectators, etc. The co-driver (navigator) uses this book along with stage notes supplied through the event, local maps, odometers, and special equipment, even computers to keep the driver on course and on time. Transit sections are sections of the event in which the team travels to get from the finish of one stage to the start of the next stage in modified production vehicles (street legal). Special Stages are where the real competition takes place. The roads are usually unpaved or seasonal roads, logging trails, mountain roads, or desert tracks. Checkpoints and traffic controls close all "civilian" access to the stages. The cars arrive at the "Arrival Time Control" or "ATC" and leave in one-minute or two-minute intervals, depending on road and weather conditions, and the team's ranking. The time it takes the competitors to reach the "Finish Time Control" or "FTC" is accurately measured. A transit section takes them to the next ATC. At the end of the rally, all the stage times are added up and the fastest car wins.

That's what its all about!

# THANK YOU

The Sno\*Drift organizers wish to thank the citizens, elected officials, staff, businesses, and the communities of Montmorency County for their continued commitment to hosting the Sno\*Drift Rally. Please remember to support our local advertisers you see in this guide when you visit Montmorency County!

We recognize and thank those who have supported and contributed gifts for the many volunteers that make this event possible.

And finally; the most sincere **Thank You** to all our volunteers, often standing in the cold for hours, to make this event happen!
